

## **ALTAIR PRO Single-Gas Detector**

Durable. Compact. Intuitive.

### **ALTAIR PRO**

Big on features, small in size

The MSA ALTAIR PRO is a reliable high-performance singlegas detector with a wide choice of sensors.

# Highly visible LEDs Wide range of sensors Audible alarm of 95 dB at 30 cm Simple bump check with checkmark for 24 hours Easy to read display shows gas concentration Strong vibrating alarm Robust, easy to grip design

#### **ALTAIR PRO**

With a wide choice of sensors ALTAIR PRO is suitable for applications including the following Industries:

- Oil & Gas
- Chemicals
- Steel & Iron
- Utilities
- Fire Service
- Contractors
- Various Industrial Applications

#### State of the Art Sensors

ALTAIR PRO features a broad range of field proven, fast-responding 20 series sensors.

Choose from  $O_2$ , CO,  $H_2S$ ,  $NH_3$ ,  $CI_2$ ,  $CIO_2$ , HCN,  $NO_2$ ,  $PH_3$  and  $SO_2$  configurations.

All sensors are simple to fit reducing instrument down time.

#### **Robust Design**

ALTAIR PRO is IP 67 rated and is designed to withstand a 3 m drop test. The extra thick rubberised housing provides protection from accidental drops.

Its tight seal ensures simple yet effective resistance to water and dust ingress. Metal screw inserts offer a high level of structural stability over the unit's lifetime.

#### **Easy to Read Display**

The ALTAIR PRO display is straightforward and extremely easy to read. The large numeric display allows users to view gas concentration, alarm conditions, battery status, set points and peak reading with accuracy and confidence.

#### **Single Button Operation**

Simple and straightforward operation is one of the key features of ALTAIR PRO. True single-button operation offers a quick and easy access to all functions of the instrument.

#### **Bump Check Indicator**

By confirming "Gas Test" with a single button press, ALTAIR PRO allows for a simple bump check, which will be recorded and displayed on the screen as a checkmark for 24 hours.

#### **Clip Options**

With the rugged suspension clip fitted as standard the ALTAIR PRO can be securely attached to clothing. Three other clips are available as options; the cell phone clip, the lanyard clip and the hardhat clip.

#### **Distinctive Alarm System**

The superior triple alarm system consists of a distinctive audible alarm of 95 dB at 30 cm, superbright LEDs visible from a 320° angle and a strong vibration alarm. The High alarm sounds distinctly different from the Low, TWA and STEL alarm and this difference is also repeated for the visual alarm. The numeric display also shows "LO" or "HI" alarm status.

#### **Full Datalogging As Standard**

A highly comprehensive datalogging facility is standard on ALTAIR PRO. The 50 latest events, along with the peak gas reading (or low  $O_2$  reading) are recorded in the session log every 3 minutes. The multi-lingual MSA Link Software is used to transfer the data to a PC via the ALTAIR PRO's Infra-Red link. Here the data can be assessed quickly and easily.

#### **Replaceable Battery**

A compact yet highly efficient CR2 battery ensures the ALTAIR PRO will run for over a year over a standard working week. These batteries are commercially available and simple to replace. The battery status is continually displayed on the instrument.

#### Simple Testing

The detector's visual, audible and vibrating alarms along with response to a known gas concentration can be checked by ALTAIR QuickCheck.

To test the ALTAIR PRO, simply press the button and place it into the test station. The test results are displayed on the three LEDs.

ALTAIR QuickCheck will be available either with automatic gas delivery system or manual regulator.

#### GALAXY

The GALAXY automated record keeping and calibration test system is a completely stand alone system that does not require a computer or network interface.

Up to 10 GALAXY modules can be connected together allowing ALTAIR PRO to be simultaneously tested and calibrated.

Over 1000 individual test records can be stored on an industry standard flash card. An optional wired connection is also available.

#### **Ordering Information**

Instrument Type	Ordering No.	Range	Resolution	Low Alarm	High Alarm	STEL	TWA
Oxygen (O <sub>2</sub> )	10074137	0-25% by vol	0.10 Vol.%	19.50%	23.00%	_	_
Oxygen (O <sub>2</sub> )	10076732	0-25% by vol	0.10 Vol.%	19.50%	18.00%	_	_
Carbon Monoxide (CO)	10074135	0-1500 ppm	1.00 ppm	25 ppm	100 ppm	100 ppm	25 ppm
